

Requirements

1 Prerequisites

A J2SE v1.3 SDK (eg from [Java J2SE site](#)) and the Apache Jakarta Ant tool to build wsif. Ant is available at the [Apache ANT website](#). To build WSIF the jars from the following packages are required:

Description	Jar names
JAXP compliant XML parser, such as Apache Xerces .	xercesImpl.jar xmlParserAPIs.jar
WSDL for Java API (WSDL4J), from the IBM developerWorks site .	wsdl4j.jar qname.jar
Apache SOAP, from the Apache SOAP site	soap.jar
Apache Axis, from the Apache Axis site	axis.jar saaj.jar jaxrpc.jar commons-logging.jar
J2EE 1.3 from the Java J2EE site	j2ee.jar

Table 1: Prerequisite jars

Currently, in order to successfully build WSIF, all the above prerequisites are required no matter which providers are going to be used.
